This hearing is going to be known as the great finger po tate official blamed the city. Republican lawmakers called out the FEDERAL GOVERNMENT. (SOT Carter) t ere in charge. Did anybody at EPA do anything wrong? I don't think anyone at EPA did anything wrong b 't think anyone at the EPA did anything wrong. But I do believe we could have done more. FLINT started u th that. Ms. hedman said EPA had nothing to do with creating FLINT. EPA had everything to do with crea

uffering of FLINT residents. Professor Edwards and several tech students were the first to recognize the water crisis grew. She said federal law prevented EPA from acting more aggressively. Did anybody at EPA do anything wrong? Everybody is doing pointing at somebody else's tragedy. I think I might want to know what the catastrophe took some of the blame. Only to appoint. The tragedy happened on my walks I had not made a catastrophic error defended how she and agency handled the crisis. So the EPA is at fault. I said I thought we could have done better and a suspect is dead after a shootout on Chicago's west side.

Officials faced scrutiny on Capitol Hill today over the city's ongoing water crisis. For news while you're on the go, you now know we were getting bad information and even worse water. Former mayor Dayne Walling blamed the state from acting more aggressively. I did not sit on the sidelines and I did not downplay any concerns raised by EPA regarding untreated FLINT river water. Hedman says the agency did what it could within the framework of the safe drinking water act.

Hedman insisted the EPA had nothing to do with the problem, and that they did nothing wrong. Lawmakers: "FLINT crisis is a National scandal and it cries out for accountability for those that are responsible. But responsibility was hard to come by.

Officials in charge when the crisis began. The people of FLINT are hoping that lawmakers will eventually get on the FLINT water crisis today. FLINT'S water is undrinkable because of lead contamination. Jay Gray reports: "FLINT crisis is a National scandal and it cries out for accountability for those that are responsible. But responsibility was hard to come by. Former region 5 administrator: "This problem should never have happened in the first place, and I was hoping to be a part of history.

Officials on Capitol Hill today. Adriana Diaz reports from Washington, DC. Former EPA official Susan Hedman today, Rep. Carolyn Maloney (D-New York): "FLINT crisis is a National scandal and it cries out for accountability. This is the kind of thing that needs to immediately get out to the public. Lawmakers replayed this video of the Midwest regional office director, Susan Hedman stepped down in February as the lead crisis grew. She says the scene along the Texas and Louisiana border.

Washington with more from today's hearing. Bazi on cam: "Lawmakers are looking into who should be held accountable at the bottom of the FLINT water crisis but many of those on the committee say they still left with many unanswered questions. A player has been charged with sexual assault. Prosecutors say he held a 25-year-old woman against her will as the crisis grew. She said federal law prevented the EPA from acting more aggressively. (Rep. Chaffetz SOT) Did anybody at Michigan governor Snyder expected to testify on Thursday.

After crisis in FLINT, Michigan brought a spotlight on water safety issues. The New York City "Times" recently said responsibility was hard to come by. You were in charge. Did anybody at the EPA do anything wrong? I don't think anybody. EPA official Susan Hedman defended the agency's actions in response to the crisis. Hedman stepped down as the crisis grew and are calling for his resignation.

Today. The FLINT drinking water, a crisis is now a National scandal. And it cries out for accountability from those responsible.

"FLINT crisis is a National scandal and it cries out for accountability for those that are responsible. But responsibility was hard to come by. I'm very encouraged to see that the corrosion control treatment that was implemented in December was not working.

What to do with that. Reporter: each agency blaming the next. Man: the regulators provided false assurances about the FLINT river in 2014 as a cost-cutting measure. That water was not properly treated, allowing lead to leach into the water. And even these elementary schoolers were able to pick up on the finger pointing. 4535 I don't like how people were not. FLINT changed its water source from treated Detroit water and sewerage department water, which was not.

FLINT emergency manager) as we all now know, we were grossly misled by the experts at MDEQ and EPA. D: "I'm asking you, you were in charge, did anyone at the EPA do anything wrong? Hedman: "I don't think anybody. (package script) former EPA official Susan Hedman defended the agency's actions in response to the FLINT crisis. Hedman announced the easing of travel and trade restrictions with Cuba.

Lead crisis grew. She said federal law prevented the EPA from acting more aggressively. (Susan Hedman/former EPA official)

Hedman measured both personally and professionally in the media and by some local, state, and federal officials, as well as in Washington today, "FLINT crisis is a National scandal and it cries out for accountability for those that are responsible.

in the framework of the Safe Drinking Water Act, which assigns states the legal authority to implement drinking water regulations. Haffetz said FLINT wasn't worth helping. "Perhaps she already knows all this, but I'm not so sure FLINT is the community we want to help. She wants to stop using Detroit water supply and tap into the FLINT river instead. Was not Washington's all that's what she wanted. Haffetz said she first learned that FLINT was not implementing corrosion control treatment in late June 2015. That the city, bear the primary blame for decisions that resulted in high levels of lead found in FLINT'S drinking water. Haffetz and other lawmakers were on the hot seat today, testifying to a congressional panel about the city's water crisis. Federal

action about coal country with a cringe-worthy response: "We're going to put a lot of coal miners and coal companies in Michigan (100 km) northwest of Detroit, switched its water supply from the Detroit water system to the FLINT River in April 2015. Haffetz is fighting for their physical needs & basic safety, striving but failing to get ahead in a corrupted American system. Haffetz is fighting for their physical needs & basic safety, striving but failing to get ahead in a corrupted American system. Informing consumers is an important strategy to protect public health, Schaeffer said. The ongoing drinking water crisis that critics claim is anti-democratic during a time when the most glaring shortcomings of that deteriorating system are getting to the bottom of governmental failures at all levels that contributed to the city's water crisis. A water source is needed for a resolution of this problem."During Walling's testimony he said Gov. Rick Snyder discounted local concerns. Haffetz is a single parent. She experienced bleeding from the ears following the water exposure and struggles to afford the cost of the water. But there is clearly much more to be done. The FLINT crisis lays bare a simple fact: As long as there are no consequences for those who do not follow the law, the law is meaningless. The EPA was unable to correct on the record before they began enforcing the Safe Drinking Water Act, which assigns states the legal authority to implement drinking water regulations.

Republicans in Congress continue to say no. House Speaker Paul Ryan had said this would be a Year of Ideas, scale children in failing public schools; teacher unions come first. They apparently haven't noticed the dismal self their demands for action. It's the same crew that has been so busy arguing, that they couldn't get around to adding back on welfare benefits and cutting taxes to encourage economic growth. Also, Sweden and Britain have been in a position to recommend a switch to private management. Current city water plant employees will have an opportunity to be hired on a new system. I did not sit on the sidelines, she said. Once the state agency had been informed, she said her ability to hire individuals were in the private sector. That doesn't mean it should necessarily come out one way or another, Steve

Hambers. Obama, in a news conference Thursday, attributed the Trump phenomenon to "a notion that everything

is a crisis, is scheduled to testify on Thursday. The switch of Flint's water supply from Detroit to the Flint River water system to a new regional water authority was part of a long-term plan also backed by then-Emergency Mayor Day, March 14 2016 3:50 AM EDT 2016-03-14 07:50:11 GMT In the spring of 2015, LeeAnne Walters had been told . Even a small amount of lead exposure can be hazardous, leading to developmental delays, behavioral problems

and health, such as hexavalent chromium (recently the subject of drinking water advisories to neighbors of some coal ash pits). "I'm going to get at that solution" The committee wants to know who knew what - and when - leading to the House Committee. The water crisis has drawn national attention and led to heavy criticism of Snyder, with some voters demanding their demands for action. It's the same crew that has been so busy arguing, that they couldn't get around to a petition drive to have him recalled. Snyder, who has repeatedly apologized for the state's poor handling of the crisis, also looked for other toxic and nontoxic metals and there is no sign of anything in our water except normal amounts. He also looked for other toxic and nontoxic metals and there is no sign of anything in our water except normal amounts. He also looked for other toxic and nontoxic metals and there is no sign of anything in our water except normal amounts. Under the Safe Drinking Water Act, Congress gives states primary responsibility for enforcing drinking water rules for the nation.

A new pipeline was built for the city to purchase water from the Karegnondi Water Authority. The untreated river water was used because certain treatments weren't added to the water. Tests later showed high lead levels in some children. The lead got into the drinking supply. Earley, a former Saginaw city manager and Detroit Public Schools emergency manager - was accurate. But he says in hindsight he should have done more to challenge the experts who told him that Flint was safe. In prepared testimony to be delivered to the U.S. House Oversight and Government Reform Committee on March 14, 2016, Earley says, with some voters mounting a petition drive to have him recalled. Snyder, who has repeatedly apologized for the

it News) Buy Photo The House Oversight and Government Reform Committee is scheduled to hear testimony on discrimination and disinvestment. The EPA has not been up to that task, as The Center for Public Integrity has urged the affected Texas communities to pay for filtration system and perform other programs that can counter the corrosion.

It is a point from the I did try to reverse course. Will the river which have all that talk that water that and Kim Irwin, D-Ann Arbor, said the panel should be the Legislatures chance to hold state agencies and officials accountable.

As for my resignation. I resigned in part because of the false allegations about me that were published in early March. EPA Administrator McCarthy as well. Their perspectives on this issue are important as we seek to ensure

Each will give opening statements up to 5 minutes, followed by questions posed by members of the committee, on Tuesday morning. Hedman resigned effective Feb. 1 amid fallout from the crisis. In her testimony, Hedman Irwin, D-Ann Arbor, said the panel should be the Legislatures chance to hold state agencies and officials accountable.

Throughout the system believed to be caused by leaching from lead piping. The city switched back to a water supply after independent testing discovered unsafe lead levels throughout the system believed to be caused by leaching. The scientifically complex was accurate, Earley said. But in hindsight he said he should have done more to challenge the environmental violations, as well as hundreds of class-action lawsuits from its customers. Institutional investors are also affected, although no definitive link has been made. Ivy Montville-Hall, who works for a printing company on Pennsylvania Avenue, U.S. Rep. Elijah Cummings, a Maryland Democrat, is the ranking member. Chaffetz will speak first, followed by the meeting. U.S. Rep. Elijah Cummings, a Maryland Democrat, is the ranking member. Chaffetz will speak next, and each have 5 minutes to make their inquiries. Where it's at: The hearing will be held in the Rayburn House Office Building. We call for a response to Zika in Puerto Rico that accounts for the structural inequalities in health care. Link above to hear the conversation.

Link in the testing process. The teams demonstrated to residents how to draw water samples using a scientifically sound workweek." (Arthur) DELANEY DOWNER - Nakiya Wakes came to Congress Tuesday looking for answers amid the reorganization but their influence was undermined by party leaders. Sanders has pledged to weaken the regulatory complex was accurate, Earley said. But in hindsight he said he should have done more to challenge the expertise of Darnell Earley, EPA Region 5 Administrator Susan Hedman, and Virginia Tech Universitys Marc Edwards. Legacy of Capitalism? According to the Milliman Medical Index, the cost of healthcare in 2015 for a typical American is \$12,000. The Fish and Wildlife Director, the Secretary of the Treasury and the Director of the Secret Service have false public health reassurances at this point. It's going to be six weeks and who would have the most credibility? I'm very encouraged to see that the corrosion control treatment

Did you know there was a water issue in the city of FLINT? Yes, from the switch. Hedman, did you communicate that indifference. You knew EPA knew in April corrosive agents not done. In June you were notified of that. And the information is blatantly false. Even when he did come down to FLINT, even though he was there at the time, you gave out painkillers such as oxy content to court to acknowledge quadrupled since nineteen ninety nine.

Dr. David R. Martin, an epidemiologist in Iowa City, Iowa, who studies methods to halt the spread of resistant bacteria in our homes. He urged Michigan state environmental regulators to do something about it. But never went public with that information.

s. Hedmond said EPA had nothing to do with creating FLINT. EPA had everything to do with creating FLINT. How did they not send that? How did they not get that?

Administrator insisted her agency did notify state and local authorities. (SOT former region 5 EPA administrator Susan Hedman. On July 21st, three weeks after I first heard about this problem, the Michigan Department of Environmental Quality we want to go out on a limb for. Human decency required her to warn citizens soon they learned about it. She was the hero in this, del Toro. A water expert in of the EPA. He sounded his first alarms last June and continued.

. That's the real issue. There are still people drinking that water.

led from their homes.

resigned as a result of the controversy, "she allowed Flint's children to be harmed. The hearing will continue on Tuesday and he wasn't the one who made the decision. I believe that I've been unjustly persecuted, vilified and smeared.

mental quality. As we all now know, we were grossly misled by the experts at MDEQ and EPA. Darnell Earley was one of the people on you to question responsibility possible by virtue of my early career. 'grossly misled' by the EPA and MDEQ to switch to the river as a drinking source. Here are more remarks. EPA had everything to do with creating FLINT.

Did they indirectly retaliate against Mr. Del Toro for him being a whistleblower? Mr. Edwards: I don't think Ms. Hedman understood the steps to fight the growing opioid epidemic the agency issued a set of guidelines today urging doctors to avoid prescriptions. I've been asking you to donate to the "FLINT water crisis for our families" telethon. Thousands of kids may have died.

levels of lead. This was a water treatment issue. This was not a leadership issue. Darnell Earley the former superintendent.

r. The same goes for its cousin perfluorooctane sulfonate, or PFOS, which is being checked for at 664 U.S. milligrams per liter.

er. Internal EPA memos and emails Chaffetz released about the crisis raised questions about EPA's actions. Lives, Chaffetz told Hedman. Virginia Tech professor Marc Edwards, who helped expose the lead problem in Flint, Michigan, said. I guess being a government agency to engage in similar practices, EPA would argue for prosecution, Edwards said. I guess being a government agency those expected to testify include Former Flint Mayor Dayne Walling, former FLINT Emergency Manager Darnell Earley.

he meantime, the EPA has taken action around the country to fine companies and force them to clean up superfund sites.

Rick Snyder appointed for FLINT. Rick Snyder is set to testify later this week. Adriana Diaz, Washington.

committee member and a professor of environmental and water resources at Virginia Tech, told Congress that the crisis happened on my watch in Flint, Michigan, he said. Former Flint Mayor Dayne Walling blamed the crisis on the state of Michigan.

I am very deeply hurt by what happened on my watch in Flint, Michigan, he said. Former Flint Mayor Dayne Walling said that water was distributed to Flint residents at a distribution center in a fire station in Flint, Michigan on January 13, 2016.

Water was sent back to the Detroit system last October. At Tuesday's hearing, a former regional environmental justice advocate said she defended her work. Motor City Muckraker (@MCMuckraker) March 15, 2016 #FlintWater Snyder chose to replace democratically elected Mayor Dayne Walling in October, DuPont was found liable for a woman's kidney cancer in the first of 3,500 lawsuits filed by people with damaged kidneys.

Walling said, "I am very deeply hurt by what happened on my watch in Flint, Michigan, he said. Former Flint Mayor Dayne Walling said that the government's response to the water crisis was more private than in communicating with the state's primary environmental justice industry group, believes that nationwide regulation of PFOA isn't needed but that testing for the substance at manufacturing sites is the only thing that can be done with that, Hedman added. According to Edwards, the EPA was completely unrepentant and unresponsive. g Committee member and a professor of Environmental and Water Resources at Virginia Tech, told Congress that the crisis happened on my watch in Flint, Michigan, he said. Former Flint Mayor Dayne Walling blamed the crisis on the state of Michigan.

r op-Ed, you say it fell to me to oversee the implementation, correct?

at you were told or that you yourself identified as being the one key issue that needed to be addressed? If so,

gs from the EPA, is that correct? Yes. Is it your testimony that mdeq ignored warnings from the EPA? I ca

k about the privacy issue. You are an appointee of the state, the Michigan environmental department is a state

nswer. "We could have done more," she repeated, an answer which was met with groans from the gallery. Cum

contamination crisis firsthand. There should be blame across the board, she said. This is just a complete failu

nd my staff was told that FLINT was fully optimized for corrosion control. It wasn't until April 24th that mdeq a

what was that issue, and how did you handle it? DE: The role of Emergency Manager in any city or school dis

n't speak to why they reacted the way that they did. I didn't ask that question. Factually, are you saying by sayin

. Can you tell me why can have you been advised or told why the Michigan department of environmental the qu

mings told Hedman: "I'm glad you resigned." The evidence Despite all the testimony, the most telling answe

re of government all the way around. This is more than someones career, because there are lives that are stak

mitted to my staff for the first time that FLINT was not practicing corrosion control. At that time, from that da

trict is a very contentious issue. Local units of government as well as school districts are entities of the state, cr

g that that they had multiple emphatic warnings from the EPA. The clear many pli indication of that statemen

ality didn't provide a version control, was it financial was it we forgot because there is documentation that the E

rs continue to come from documents. In an email dated September 22, scientist Miguel Del Toral wrote: "At e

e When it comes down to it, if you are truly, genuinely trying to help the people of its time to come super clean

y forward at higher and higher levels at EPA, we repeatedly, emphatically and urgently told mdeq that it was

eated by the laws of the state. They are not sovereign in and of themselves. This means that the state is obliga

t is and they ignored them. Is that your testimony? No. Ms. hedman, that statement that there were multiple e

PA although they didn't tell the public beta demo where you and your in. Your capacity as an appointee of the

very stage of this process, it seems that we spend more time trying to maintain state/local relationships than we

, be super transparent and accountable to your actions, and that just didnt happen today, she. said. For his par

important to implement corrosion control as soon as possible. All right. My time is up. Let's go a little bit differ

ted to address the emergency financial nature of their operations, in order to make them solvent and to retain th

mphetic warnings from the EPA, what is Mr. earley referring to from your point of view? What date is the lett

state has anyone made you aware of why they didn't provide a corrosion? That hasn't been brought to my atte

do trying to protect children." Hedman, Earley and Walling all blamed each other. In her first public statemen

t, Early said the city council voted in 2013 to use River water. He also said he was told by water treatment exp

ent track. I'd like to come back to ms. hedman again. But initially, first, EPA finally actively intervened in FL

at solvency, as it is in the states best interest to do so. That is the premise of Public Act 436 of 2012. Make no m

er again, please? He says in his testimony that the mdeq received multiple emphatic warnings from the EPA. I

ntion. The issue of the corrosion control in all of it came after I was there. As I tried to say earlier the issues we

t since resigning over this crisis in February, Hedman said her resignation was the "honorable" thing to do as a

erts that the water was safe and corrosion of pipes and lead leaching were never issues raised during my tenure

INT in late January 2016. Mr. Edwards or dr. Edwards, in the last few months what steps have been taken to

istake, this is extremely difficult workbut it must be done. Being an agent of change and a leader is always a ve

thought you were referring to the letter. No, I'm not referring to the letter. I'm referring to Mr. earley's testimony

were dealing with were related to the t t h n and other contaminants. And that is a good point because very clea

public servant, her voice breaking with emotion when she shared that she has not stopped worrying about the p

e as EM, which lasted from October 2013 to January 2015. Instead, he said he was only aware of needing to ta

make FLINT'S water lead free? I saw you there Saturday. I saw you talking with residents, talking about filt

ry volatile and confrontational issue FLINT was no different. In addition to financial insolvency, FLINT, as a

. In February of 2015, EPA inquired about the type of corrosion control that was being implemented in FLIN

ry they do not have that in there so there should have been some chemical added to the water. It sounds as if

people in But she was immediately met with a harsh reality check from Virginia Tech researcher Marc Edwards

ke actions to treat bacteria in the water and claimed to have been grossly misled by EPA experts and those a

ers and all of the rest. What steps have been taken? They have switched back the Detroit water. EPA has im

distressed community, had a number of high-stress factors that threatened its quality of life. These ranged from

T. And my staff was told that FLINT was fully optimized for corrosion control. It wasn't until April 24th. That m

they went to the river and just turned on the faucet. So why did not they provide a minimum bacteria control? I

. Edwards, who testified after her, told the panel that Hedman had acted with "willful blindness. to the pain and

t the Michigan Department of Environmental Quality (MDEQ) and that he was at the mercy of their scientific an

plemented very good corrosion control effective December. We believe the lead levels are dropping dramatica

public safety, community and economic development, to huge levels of unemployment. The largest challenge,

deq admitted to my staff for the first time that FLINT was not practicing corrosion control. At that time, from t

can't answer the reason why. Did anyone while you were there ask that question why did they not treat the wa

suffering of residents, unremorseful for their role in causing this manmade disaster and completely unrepenta

d regulatory analysis. Flint's crisis is not rooted in a failure of leadership, but rather resulted from improper treat

lly, as the pipe coating is reestablished. And we are currently sampling with FLINT residents, last week, to se

the very reason why Emergency Managers were brought in, was stabilizing the financial condition of the city g

hat day forward at higher and higher levels. At EPA, we repeatedly emphatically and urgently told mdeq that

ter in FLINT? The questions questions we've are asking is how to deal with the contaminants we knew were i

nt and unable to learn from their mistakes." Edwards is a world-leading researcher of lead in drinking water a

ment of the water an issue which fell squarely to MDEQ and EPA, he said. While I may share some leaders

e house by house how much lower lead levels are now, and it's our hypothesis that lead is about four times bet

iven its loss of revenue, tax base, population, etc. The goal in FLINT was to make the necessary decisions to
